EagleMed - Cody	0	NA	
Health One Airlife - Cheyenne	0	NA	
Intermountain Life Flight – Rock Springs	0	NA	
Wyoming Life Flight – Air Methods	0	NA	

About This Report:

Requirements from the Rules and Regulations:

"Rules and Regulations for Wyoming Emergency Medical Services Act of 1977", W.S. 33-36-101, Chapter 4, Section 4:

(a) Each EMS Agency response shall be recorded on either an electronic or written PRC as approved by the Division.

(b) The EMS Agency shall submit electronic or written PCRs to the Division, in the manner proscribed by Division policy, by the tenth day of the month following the provision of service, or within shorter time as the Division may request.

Chapter 10, Section 14. *Patient Care Reports. All Division and Board approved fire protective services shall submit a patient care reporting form for all patients evaluated/treated by their EMT Basic, EMT Intermediate and Paramedic personnel. Each patient report shall be recorded on a report form approved by the Division, disk or hard copies of the completed patient care reports to the Division. These shall be due on the tenth day of the next month or within such shorter time as the Division may request.*

About the Validation Score:

An agency's Validation Score is a numerical score used to indicate the level of completeness of a patient care report in the Wyoming Ambulance Trip Reporting System (WATRS). This score is generated based on issues identified as:

a) Improvement Needed

b) Estimation of Importance.

The WATRS software enables validation rules to be customized to check the input of data based on conditions. This "configuration" of the validation rules provides the ability to score or weight the value of particular data element being collected. The points for any specific rule can range from 0 to -99. When the conditions of a rule are met, the points are applied to the validity score of the incident report.

The OEMS WATRS Administrator receives input from EMS agencies, the WATRS Advisory Group, epidemiology, the Trauma Program and other(s) regarding the priority of data elements and assigns a number of points to be deducted if those fields are left blank or entered improperly.

The lower the validation score, the less complete the incident form is. A validation score of 100 indicates that all identified fields are completed. This is only a measure of *completeness* not *accuracy.* For example, a validation score cannot ensure that the correct address is entered or that the patient's name is spelled correctly, just that an address or last name was filled in.

Validation rules are applied evenly throughout Wyoming. If a specific event indicates the validation rule may not apply, consideration is given to determine if the WATRS can accommodate the exception.

Hospital Preparedness Grant

To qualify for the $10,000 Hospital Preparedness Grant, EMS agencies must have an average validation score of 95 in the previous quarter. The OEMS provides assistance to ambulance services that request it to help improve validation scores or answer questions on validation scores.

Available from the Wyoming Office of EMS:

- Access to the WATRS software package for patient care reporting
- Ruggedized tablets and other hardware based on the availability of funding
- Initial and recurring training in the use of the WATRS system
- Ability to upload electrical cardiograph (ECG) rhythm strips or 12-lead ECGs from various vendors
- Technical support through the Image Trend Help Desk, as well as the OEMS
