## Make a Difference

Wyoming's Volunteer Registry for Medical and Emergency Medical Professionals

#### INTRODUCTION

The Wyoming Volunteer Registry, "WYeROLL — Wyoming Enrollment, Response, Operations, Logistics, Let's Enroll", system was implemented by the Wyoming Department of Health — Hospital Preparedness Program in 2007. WYeROLL serves as a Local, State, and National web based volunteer registry system for both medical and non-medical volunteers.

The mission of WYeROLL is to register, notify, and inform *registered* and *qualified* volunteers to assist in the event of an emergency, public or health care incident or disaster.

WYeROLL has the ability to notify registered volunteers via phone or email when there is an event that requires volunteers. This system is also equipped with the ability to search for specific volunteers depending on the location and needs of the incident or emergency. WYeROLL administrators also run credential verifications upon initial registration and every 6 months after to verify volunteers are qualified to perform the needed services for each incident or emergency.

This system is secure, and all personal information will only be used to contact the volunteer if the need arises.

Register TODAY! Make a DIFFERENCE! https://vol.wvoming.gov.

Remember, this system is **VOLUNTARY**. Registering means you are willing to volunteer but it does not commit you.

#### WHO CAN REGISTER?

- Doctors
- Nurses
- EMTs / Paramedics
- Mental Health Counselors
- Medical Technologists
- Medical Transcriptionists
- Healthcare Information (HIT)
