

Be Our Guest at the Willson Manor Guest House

At the Visions program, we consider family an important part of the rehabilitation team. Family education is continually provided as part of the treatment process. A family/friend support group is also available. To facilitate family involvement, guest housing is available on the WLRC campus which allows family members to be near their loved one.

We invite the families of our clients to "Be Our Guest" during their loved one's stay at the Visions Program. Guest housing is available at Willson Manor and is within walking distance of the Visions homes.

Willson Manor is fully furnished to help make your stay convenient and pleasurable. Meal tickets are also available to purchase for oncampus meals at our cafeteria. Rooms are contingent upon availability and occupancy limitations apply.

If you are interested in staying with us at Willson Manor, please call 307-335-6795 to make arrangements.

VISIONS - A Residential Brian Injury
Treatment Program

Some individuals with brain injuries have problems too difficult to address in traditional, community based programs or by the family at home. These situations include complex medical issues, bowel and bladder management, impairment of daily living skills and behavioral issues. Any one of these factors or a combination of them can result in a person being placed in an inappropriate setting that is unable to meet their special needs. Addressing these complex and challenging problems requires the knowledge and skills of a dedicated brain injury team.

Visions is a residential brain injury program specifically designed for individuals with challenging medical, physical, or behavioral problems. The Team provides an active and functionally oriented program offering both transitional and long-term care. Visions enhances quality of life by providing the least restrictive, most appropriate, most integrated environment that allows individuals an informed choice to function at a maximum level of independence.

Visions provides a home-like environment and meaningful daily activities that encourage a dignified and functional lifestyle. Individual Program Plans are designed based upon the individual's needs and desires, future placement and goals such as: enhancement of physical and emotional fitness, social and behavioral development, home and community mobility, communication and cognitive skills, vocational skills, situational assessment and job coaching, and strategies for independent living.

Visions has a Team of professionals, on site, to assist in accomplishing these goals. The Team includes: Physicians, RN's, Physical Therapists, Occupational Therapists, Speech Therapists, Behavior Specialists, Therapeutic Recreation Specialists, Certified Brain Injury Specialists, Dietitians, Chaplain and other specialty services.

The Wyoming Life Resource Center provides nursing services to all individuals residing at WLRC, including clients in the Visions Program. Nursing services are also available in an out-patient clinic that is utilized for daily appointments with staff physicians, consultations with outside physicians and specialty

clinics. Along with the clinic, we have physician, respiratory, laboratory/x-ray, pharmacy and dental services on-site. Our Horizons Health Care Center is an acute in-patient area staffed with nurses 24 hours a day. WLRC also provides 24 hour EMS coverage through the security department.

The Visions Program is located on the beautiful campus of the Wyoming Life Resource Center, on Lander, Wyoming. The Visions Program residences are located in their own part of the campus, and are focused exclusively on the needs of people with brain injuries.
